*Empowering Health Care*

To whom it may concern:

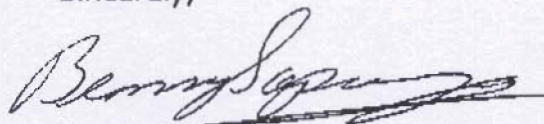

RA Tech has provided electrical services to McKesson Canada in our five facilities across Ontario since 2006. The services provided have included part supplies, scheduled/unscheduled maintenance calls, project installations or failed operations equipment, all at a fair and competitive cost.

Through the years as our Service provider RA Tech has maintained a history of our equipment failures and can now reduce the quantity of breakdowns by appropriate scheduling.

Mr. Rick Arthur and his team have always been knowledgeable, quick at diagnosing and resolving causes of failure. They have provided fast responses to emergency 24 / 7 emergency calls. Services have always been conducted in a professional manner with minimal interruption to the balance of our facility. His staff has always conducted all services in a safe, orderly manner in accordance with our Company policies and complied with our Health and Safety regulations.

The service that RA Tech provides to McKesson Canada proves to be a valuable asset to any establishment in any capacity. I would highly recommend his services to anyone requiring the support electrical expertise in their company.

Sincerely,

Benny Sapienza  
Facilities Supervisor & SSO
